Meeting Recording

Goals

- Prioritize security issues based on LFX Security dashboard findings
- Assert the need for User Story Template fulfillment for any new initiative to be undertaken

Discussion items

Time	Item	Who	Notes
	OpenSSF checks (#443) clomonitor findings (#444)	Ved	<ul style="list-style-type: none">• Prepare a common template that can be shared across all the projects. And keeping a common github action workflows that can be imported in the individual repos.
	LFX Security Dashboard for Nephio	Rahul Jadhav	
	Service Mesh updates (user story template?)	Shiv	<ul style="list-style-type: none">• Requirements still to be worked upon. Shiv is preparing towards this.
	Secrets Mgmt updates (user story template?)	Prashant Mishra	<ul style="list-style-type: none">• User story template is in draft. (https://docs.google.com/document/d/1Ce_cR7afovjWsdECkV8kNbPreG5GirJXP5lrSiABjg/edit?usp=sharing)
	Per repo best practices templates (How to handle updates?)	Rahul Jadhav	
	SALSA L4 requirements (topic brought up yesterday in SIG-Release meeting)	Rahul Jadhav	
	Policy framework discussion	subhash kumar singh	<ul style="list-style-type: none">• Management cluster currently has an auto approval that simply allows everything that passes through it. If we can gate it through the policies that enforces best practices guidelines, that could be an easier win.• Runtime policies in the target workload clusters can also be orchestrated through this mechanism (by using Mutating controller) .. but this could be a second phase.
