- Tom Kivlin
- Wim Henderickx
- subhash kumar singh
- Byung-Woo Jun
- Gaurav Mishra
- Prashant Mishra
- Ved Ratan
- Shiv Bhagavatula
- Raj Panchapakesan
- Timo Perala
- Rameshwar Kanade

## Recording

GMT2024...160.mp4

## Goals

## Discussion items

| Time | Item | Who | Notes |
|------|------|-----|-------|
| 10min | Review pending action items | All | |
| 10min | Service Mesh updates | Shiv | <ul><li>Shiv to respond to the comments on the document. Thanks Byung-Woo Jun for the review.</li><li>Personas/Responsibilities for the deployment need to be clarified.</li></ul> |
| 10min | Secrets Management updates | Prashant | <ul><li>Orgs already have existing tools to use, thus decoupling the secrets manager functionality from core Nephio APIs is necessary.</li><li>Identity is a precursor for this work since secrets authz is completely dependent on it.</li><li>IAM and secrets mgmt need to work together.</li></ul> |
| 10min | Identity & Access Mgmt updates | Bryan/Byung/Manuela | <ul><li>User Identity vs Workload Identity might be two different action items?</li><li>Manuela: Are there any other users that we might have to consider apart from the management console access users? Administrative users?</li><li>Identifying the set of users/roles – as a prerequisite for requirements identification?</li><li>Tom: Workload Identity might have to be part of the base Nephio functionality. User Identity might depend on existing enterprise systems.</li><li>Byung: Reference implementation for user identity has to be chosen.</li><li>Byung: expect updates to the user story document.</li></ul> |
| 5min | Next TSC meeting update | All | <ul><li>Scope for R3 deliverables</li></ul> |

| | Package validation | Subhash | • Wim: Split into management vs user plane clusters requirements. |
